

Edwards E306 upgrades

Don't throw it out!

Breathe new life into your E306 coater with upgrades from Moorfield!

Moorfield have been working with the Edwards E306 system for more than 2 decades. We have highly experienced engineers who can refurbish, re-engineer and service your unit. We can also provide frequently-used spare parts.

Common tasks include:

- > **Cleaning or repairing old components**
- > **Replacing obsolete components with modern equivalents**
- > **Modifying in-chamber techniques to fit new applications**

For most jobs, work is carried out at our factory where we have the tools and facilities required. However, we are able to carry out simple tasks at your location.

Pump replacements

Backing pump replacements (rotary or dry scroll)
